

Volunteers Needed

Our research team is currently **seeking parents** of autistic individuals/individuals with autism spectrum disorder (ASD) to **participate in a study**. Participants will **complete an anonymous survey** aimed at understanding factors that contribute to parental **quality of life** and parental **self-care practices**.

SCAN NOW

Who is eligible?

- Parents (specifically the primary caregiver) of an autistic individual/individual with ASD who is receiving applied behavior analysis (ABA) therapy.
- Participants must be over the age of 18, must be able to read and write in English, must reside in the US, and must have access to a computer or mobile device and internet.
- Only one caregiver per household should complete the survey.

Participation Requirements

You will be asked to provide demographic information about you and your child, respond to questions about your involvement in ABA therapy, and provide ratings of your parenting stress, your internal resources (e.g., coping strategies), social supports, self-care, and your quality of life as a caregiver.

Time Requirements

Survey should take approximately 20 minutes to complete.
