

## We are looking for feedback from Autistic Teenagers about Intervention!

- Are you an autistic teen between the ages of 13 and 17?
- Are you interested in giving us your opinion on interventions used with autistic children?

If so, you might qualify to participate in our research study being done at UCSB. Participation will include a Zoom or in person meeting where the project will be discussed by the researcher with the teen and parent. The teen will then be asked some interview questions that they can answer in writing or verbally. The interview will take approximately 60 minutes.

Fill out the following form by scanning the QR code to see if you qualify. Please contact **Kaitlynn Penner** at [kpenner@ucsb.edu](mailto:kpenner@ucsb.edu) with any questions.
