Acquisition

Most basic stage of learning a new skill or concept

Students often make mistakes and will need a high level of support

Copyright 2024 Jenny Root, PhD

Fluency

- Learner can use skill with greater ease and efficiency
- Fluency is how learning **begins** to be useful!
- Don't build speed at the expense of accuracy

Copyright 2024 Jenny Root, PhD

Maintenance

- Ability to perform a response over time without reteaching – the **bridge** to generalization
- Students who have achieved maintenance show signs of
 - Habit
 - Self-initiation
 - Independence
 - Accuracy
 - Consistency over time

Copyright 2024 Jenny Root, PhD

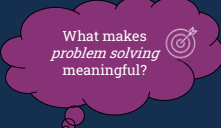

Generalization

- Most important phase and primary purpose of learning
- Application of a skill in different settings, with different people, or different materials
- Consistently, accurately, and independently performing a skill under different conditions

What makes *problem solving* meaningful?

Solely focusing on *what* to do and not *when* or *why* limits independence

Copyright 2024 Jenny Root, PhD

“There’s a lot of people right now who have been given permission to be innumerate because **society has deemed innumeracy as OK**. As long as you’re not a math person, it’s perfectly fine to fail math”

- Jose Vilson

Decade	Broad Instructional Focus
1970s	Developmental focus based on “mental age”
1980s	Criterion of ultimate functioning – functional curriculum
1990s	Promotion of social inclusion, self-determination & social skills training
2000s	Attempt to balance academics & functional skills despite lack of training & research
2010s	Grade-aligned academic standards, evidence-based practices
2020s	?

How would you describe your K-12 math experience?

"The ways students experience math instruction influences how they identify themselves as doers of mathematics"

-Thomas & Berry (2019)

Copyright 2024 Jenny Root, PhD

Influence of Assumptions & Beliefs

I take **ACTIONS** based on my beliefs.

I adopt **BELIEFS** about the world.

I draw **CONCLUSIONS**.

I make **ASSUMPTIONS** based on the meanings I added.

I add **MEANINGS** (cultural and personal).

I select **DATA** from what I observe.

All the information in the world.

Demands of the Environment

Personal Competence

"Is the student able to ____?"

Copyright 2024 Jenny Root, PhD

This slide features a dark blue background. On the left, there is a white icon of a building with a flag on top, positioned above the text "Demands of the Environment". Below this, there is a white icon of a person, positioned above the text "Personal Competence". To the right of these elements is a purple rounded rectangle containing the text "Is the student able to ____?". At the bottom left corner, there is a small white text "Copyright 2024 Jenny Root, PhD".

Demands of the Environment

Personal Competence

"Is the student able to ____?"

Copyright 2024 Jenny Root, PhD

This slide is identical in layout to Slide 1, with the text "Demands of the Environment" and "Personal Competence" separated by a larger vertical gap. The purple callout box and copyright notice are also present.

Demands of the Environment

Personal Competence

"Is the student able to ____?"

Copyright 2024 Jenny Root, PhD

This slide is identical in layout to Slide 1, with the text "Demands of the Environment" and "Personal Competence" separated by a larger vertical gap. The purple callout box and copyright notice are also present.

 Demands of the Environment

Deficit-based { Is the student able to "do math"?

{ Strength-based What supports does a student need in order to "do math"?

 Personal Competence

Copyright 2024 Jenny Root, PhD

 Demands of the Environment

Environments (& systems) are disabling

Disability results from mismatch of environmental demands & individual profile of strengths & needs

Acknowledge individuals have unique profile of capabilities and limitations

"Is the student able to _____?"

 Personal Competence

"Gen ed" v. "Special ed" students

Does not have the ability to learn to read or do math... So what is the point?

or

Students struggling in

Instruction isn't working – What might be the cause and what are some solutions?

"In addition to their collective diversity and need for lifelong supports, individuals with extensive support needs share a fundamental human trait – the capacity to learn". -Snell (2003)

Copyright 2024 Jenny Root, PhD

"He is obsessed with cars"

"He is very passionate and enthusiastic about cars"

"He has severe meltdowns"

"He feels emotions intensely"

"He is rigid with routines"

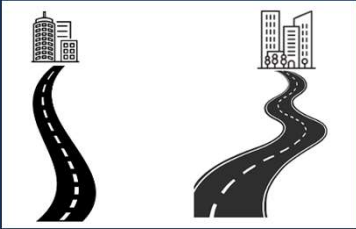

"He prefers consistency and sameness"

"He is low-functioning"

"He needs a higher level of support"

Criterion of the Least Dangerous Assumption

"In the absence of conclusive data, educational decisions ought to be based on assumptions which, if incorrect, will have the least dangerous effect on the likelihood that students will be able to have enviable adult lives."

– Anne Donnellan (1984)
(my editorial change)

Belonging in Community

Meaningful Work

Fulfilling Relationships

Opportunities for Post-secondary Training

Variability:
A natural part of the human condition

Copyright 2024 Jenny Root, PhD

Science of Reading

A **body of research** that relies on knowledge accrued across disciplines – including general education, special education, educational psychology, communication sciences, and neuroscience.

Focus is on how people learn to access and comprehend text

Science of Math

A **body of research** that relies on knowledge accrued across disciplines – including general education, special education, educational psychology, and neuroscience.

Focus is on how people learn to be doers and thinkers of math

Copyright 2024 Jenny Root, PhD

Proficiency is the Expectation for All Learners

Similar to reading and writing, we can think of math proficiency as a blending of:

- CONCEPTS**
Understanding concepts, operations, and relations
- PROCEDURES**
Using procedures flexibly, accurately, and efficiently
- STRATEGIES**
Formulating, representing, and solving problems
- REASONING**
Reflecting, explaining, and justifying
- DISPOSITION**
Seeing math as sensible, useful, and worthwhile

Meaningful Problem Solving Tasks

Use a Real-World Context

Activities?
Routines?

Relevant IEP goals?

More independence or opportunities?

Copyright 2024 Jenny Root, PhD

Meaningful Problem Solving Tasks **Use a Real-World Context**

- ✓ Provides background information
- ✓ Makes learning truly "functional"
- ✓ Makes instruction meaningful & **personally relevant**
- ✓ Opportunity to address *multiple priorities*

Meaningful Problem Solving Tasks **Proactively Support Independence**

Simply knowing *what* to do without *when* or *why* is insufficient

Copyright 2024 Jenny Root, PhD

Meaningful Problem Solving Tasks **Proactively Support Independence**

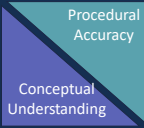

Potential Barriers to Anticipate

Numeracy: math facts, place value, number ID, rote counting forward and backward, cardinality, counting with 1:1 correspondence

Literacy: syntax, vocabulary, decoding, background knowledge

Executive Functioning: working memory, shifting attention, mental flexibility

Communication, Metacognition, Gross & Fine Motor Skills

Copyright 2024 Jenny Root, PhD

Fantasia Christmas After Midnight
Fri 12/8 @ 8pm
Ovens Auditorium, Charlotte, NC

Sec ORCHCL, Row V
Standard Ticket **\$79.50 ea**

Tamra wants to go see Fantasia's Christmas concert. She makes \$10 per hour at her after school job. How many hours will she need to work in order to pay for one ticket?

$\$ \square \times \square = \$ \square$
 $x = \square$

1.	✓	\$?	Identify constant
2.	✓		Identify goal amount
5.	✓	$\$ \square \times \square = \$ \square$	Fill-in equation
6.	✓	\div	Divide
7.	✓	$x = \square$	Write answer

🎯

Meaningful Problem Solving Tasks

Proactively Support Independence

Word problem solving is a natural opportunity to develop and apply **social and emotional learning (SEL)** and **self-determination (SD)**

- ✓ Build students' confidence, perseverance, and goal-directed behavior
- ✓ Promote cognitive and emotional regulation skills needed for decision making

- ✓ Teach self-monitoring by having students self-evaluate
- ✓ Support goal setting to increase independence

🎯

Meaningful Problem Solving Tasks

Proactively Support Independence

1. What types of problems did you solve?
2. What was your goal today?
3. You were able to get ____ steps independently correct, let's graph your progress
4. What do you think your goal should be for tomorrow?
